

Kaweah Delta Health Care District

Residential and
Commercial
Land Development

This five-story structure was designed to best utilize a relatively small, creek-side property.

Towering trees, lining the banks of nearby Mill Creek, provide upper floor occupants on the creek side of the building with a serene, treetop view through expansive, floor to ceiling windows.

Special consideration was given in the planning and execution of the project to ensure that the trees and creek were not compromised by the construction.

500 W. Mineral King Avenue • Visalia, California

- 60,000 square foot, 5-story support services building
